

Your Benefits

- + quick
- + easy handling
- + battery-operated
- + reverse function and drive control function
- + ergonomic design with a adjustable handle

Your demand ...

Since more than 20 years firefighters all over the world use and love our hose winder series ROLLY. Many customers asked us for winder for 110 mm (5") hoses.

... and our innovative solution ...

... the 5" HOSE ROLLER is light and compact like his small brother ROLLY IV. Hoses with Storz couplings up to 110 mm (5") in diameter and 60 m (200 ft) length can be wound. The handle and the arm with the hose-guide are foldable to ensure a very small volume of the unit. Thus he can easily be stored in the firetruck. The forceful electric drive is powered by an exchangeable 28 V battery Milwaukee type (Genesis Rescuetools type), the speed is adjustable up to 6 km/h (4 mph).

... with excellent features made by BARTH.

The innovative coupling bracket precisely hold the coupling before winding. While the operator fixes the coupling in the bracket the integrated stand helps to stabilize the unit. The winder advances along the hose while winding. Hereby the hose with coupling isn't dragged and by this less stressed through abrasion. An adjustable hose-guide will guarantee a proper wound hose-coil and the water-drain while the hose is wound.

After winding the hose coil can be effortlessly discarded to the back. The coiled hose can easily be removed with hose-removal aid.

Technical Specifications

Product Code	156874
Electrical Power Supply	28V / Milwaukee Akku
max. coupling size	110mm (5")
max. hose length	60 m (200 ft)
Dimension	850 x 500 x 350 mm (33" x 20" x 14")
Weight	30 kg (58 lb)
